

PDR Kalk

Comprehensive Paintless Dent Repair Estimation & Business Management Software
Feature Overview for Competitor Comparison • Version 4.17

1. Hail Damage Estimation — Multi-Matrix Support

PDR Kalk supports **four regional pricing matrices**, each with full automated calculation according to the official published tables:

Matrix	Region	Size Classes	Details
VFFS 2025	CH	0–25 mm, 25–50 mm, >50 mm (×1.5)	Two-class row/column lookup, up to 600 dents per class per panel
Zürich 2024	CH	0–20 mm, 20–35 mm, >35 mm (×1.5)	Separate small/medium lookup tables, Swiss-region variant
BVAT 2025	DE	8 size classes (1–8)	Orientation-aware (horizontal/vertical), 10er/12er divider, sequential surcharges: Aluminium +25%, Glue +30% (compounded), Push-to-Paint –40%
Österreich 2025	AT	leicht (≤20 mm), mittel (21–30 mm), schwer (31–45 mm)	Range-based AW lookup, Alu surcharge +23% baked in, Vorrichten (setup) per panel count, configurable Ansatz (160–190 EUR/Std)

14 fixed vehicle panels with standardised naming across all matrices: Hood, Fender FL/FR, Door FL/FR/RL/RR, Quarter Panel L/R, Roof Rail L/R, Roof, Trunk Upper, Trunk Lower.

Advanced Rapport Editor Features

- Fully automated AW/cost calculation as dent counts are entered — instant live totals
- Surcharge system: Aluminium, Glue/Kleben, Oversize, De-/Montage integration per panel
- De-/Montage (disassembly/reassembly) AW values integrated directly into panel calculations
- Kleinmaterial (small materials) percentage auto-calculated
- Optional photo attachments per rapport — embedded as dedicated photo pages in PDFs
- Discount support (percentage-based) with currency-aware 5-Rappen rounding (CHF) or cent rounding (EUR)
- Arrow-key grid navigation for fast data entry across all 14 panels

2. Parking Dent Estimation (Parkschaden)

Three flexible pricing modes for non-hail dent work:

Mode	Description
Itemised (Per Panel)	Individual price per panel — full line-item breakdown on rapport
Flat Rate (Pauschalpreis)	Single total price per vehicle — quick quoting for standard jobs
AW-Based (Time & Material)	AW value × hourly rate per item — transparent time-based billing

- Surcharges: Ersatzwagen (rental car, per-day), custom/user-defined surcharge labels

- VAT toggle, discount percentage, CHF/EUR currency selection
- Same photo, export, and invoicing workflow as hail rapports

3. Regional & Cross-Border Support

Three Regions

- **Switzerland (CH)** — CHF, MwSt 8.1%, QR payment slip, 5-Rappen rounding
- **Germany (DE)** — EUR, MwSt 19%, DATEV export, Stornorechnung
- **Austria (AT)** — EUR, USt 20%, Austrian pricing matrix

Cross-Border Features

- Automatic EUR currency switch for EU-27 customers
- **Reverse charge** invoicing when customer provides USt-IdNr
- Country-aware ISO codes, EU membership detection
- Region-aware VAT labels (MwSt / USt) and formatting

4. Document Types

Document	Prefix	Purpose
Kostenvoranschlag (Estimate)	KOST-	Pre-work cost estimate / quote for customers
Arbeitsrapport (Work Report)	ARB-	Detailed hail damage repair report with full panel breakdown
Parkschadenrapport	PARK-	Parking dent repair report
Quittung (Receipt)	QUT-	Payment receipt for completed work
Rechnung (Invoice)	RE-	Full invoice with optional QR payment slip (CH)
Gutschrift / Stornorechnung	GS- / SR-	Credit note — full or partial, CH/DE region-specific naming
Abtretungserklärung	ABT-	Assignment-of-claims declaration for insurance direct work
BVAT Rapport	—	German hail damage rapport (BVAT-specific PDF layout)
Split Invoices	RE-	Separate insurance + customer deductible invoices (insurance workflow)

5. Invoice & Document Customisation

Company Branding

- Custom company logo (PNG/JPG) with adjustable max-height
- Company name, owner (Inhaber), full address, phone, email, website
- All branding applied consistently across all document types

Document Numbering

- Configurable prefix and next-number for every document type independently
- Supports leading-zero formatting (e.g. ARB-004 → ARB-005)
- Separate credit note numbering counter (GS- / SR-)

Filename Templates

- Customisable per document category with dynamic placeholders: {Nr}, {Fahrzeug}, {Kennzeichen}, {Kunde}, {Datum}

Invoice / Rapport Text

- Custom intro text for company and private customers (with gender-aware salutation)
- Placeholder support: {Nachname}, {Zahlungsfrist}
- Custom closing text
- Custom Abtretungserklärung paragraphs
- Per-customer payment term overrides

Financial Settings

- VAT registration toggle with number display
- Configurable payment terms (global default + per-customer override)
- Swiss QR payment slip toggle with full bank account configuration
- IBAN, account holder, and reference number for QR bills

6. Address Book — Five Categories

Category	Features
Company Customers	Full business contact details, billing email, custom payment terms, fleet management
Private Customers	Individual contact details with gender-aware salutation (Herr/Frau)
Insurance Companies	Insurance-specific fields, used in insurance direct workflow, email integration
Subcontractors (Subunternehmer)	Payment model config (AW rate / percentage / fixed), permissions, branding, encryption key
Auftraggeber (Job Givers)	Principal/fleet operator contacts, sub-list of Auftraggeber customers, auto-created on import

Alphabetical A–Z quick-filter bar across all categories.

7. Insurance Direct Workflow (Direkt-Versicherung)

A guided 4-step workflow for insurance-covered repairs:

Versicherungsfall — Capture insurance name, claim number, deductible (Selbstbehalt) with three modes: customer pays full, workshop absorbs part, or workshop absorbs all

Abtretungserklärung — Generate assignment-of-claims document with digital signature pad, status tracking (Erstellt → Unterschrieben → Versendet)

Versand an Versicherung — Send rapport + Abtretung directly to insurance company via integrated SMTP email

Rechnungsstellung — Automatic split-invoice creation: insurance invoice + customer deductible invoice (if applicable), with live preview of amounts before creation

The **Abtretungserklärung** (Assignment of Claims) is a dedicated PDF document with customisable legal paragraphs and integrated digital signature capture — eliminating the need for paper forms.

8. Subcontractor Management (Sub-Workflow)

- **Bidirectional encrypted transfer:** Auftraggeber → Sub (job package) → Fertigmeldung → Auftraggeber (completion report)
- **AES-256-GCM encryption** for .pdrkalk job files — share key once, auto-encrypt/decrypt
- **Three payment models:** AW rate (per AW), percentage of configurable base, or fixed amount
- **Configurable permissions per sub:** can edit rapport, can create new rapports, can invoice customer directly
- **Four work order display modes:** Full rapport, AW detail, flat rate (Pauschal), or damage list only
- **SHA-256 hash-based change detection** on rapport return — flags modifications, requires change note
- **Sub PDF branding:** Sub's documents use Auftraggeber's logo and branding (never the sub's own)
- **Sub billing statement PDF** and dedicated sub invoice creation
- **Workflow status tracking:** Zugewiesen → In Arbeit → Erledigt → Beahlt (+ Storniert)
- **Full audit trail:** 12 event types logged across both Auftraggeber and Sub sides

9. Audit Trail & Transparency System

A comprehensive, tamper-evident audit system designed to provide full transparency and proof of document integrity — invaluable during disputes or compliance reviews.

- **Append-only activity log** — every business-relevant action is recorded with timestamp, actor, and description
- **SHA-256 hash chain** — each audit entry is cryptographically linked to the previous, creating a tamper-evident chain (verifiable via export)
- **Document versioning** — automatic version snapshots at compliance-critical moments (pre-edit, pre-cancel, pre-recalculation)
- **Email send tracking** — records when, to whom, and which documents were sent via SMTP
- **PDF snapshots** — archived copies of documents at point-in-time for dispute resolution
- **Region-aware edit policies:**
 - CH: freely editable until sent; sent documents editable with confirmation + version snapshot; paid/dunning locked
 - DE/AT: editable while draft; locked after sent (changes only via formal cancellation)
- **Invoice cancellation** — formal process with mandatory reason, optional replacement invoice, full audit logging
- **Credit notes** — full or partial, with back-calculated net amounts and back-references to original invoice
- **Historie sidebar** — slide-out panel showing complete activity log, email history, and version snapshots per document
- **Audit export** — JSON download with SHA-256 chain verification for external compliance review
- **Audit tables survive data clearing** — even a full reset preserves the audit trail

10. Export & Accounting Integration

Export	Format	Region
Offene Debitoren (Open Receivables)	Excel (.xlsx)	All
Rechnungen Export (Invoice Export)	Excel (.xlsx)	All
MwSt / USt Export (VAT Declaration)	Excel (.xlsx)	CH DE AT
DATEV Export	CSV	DE
Audit Trail Export	JSON (SHA-256 verified)	All

11. Backup & Restore

Two Backup Tiers

Tier	Contents
Standard	Settings, customers, estimates, invoices (without photos)

**Vollständig
(Complete)**

Everything above + all photos as binary JPEGs + complete audit trail (activity logs, document versions, email logs, PDF snapshots, links)

Import & Restore Features

- **Per-job import** — import individual .pdrkalk job files (subcontractor workflow)
- **Full system restore** — restore entire backup with conflict detection and smart merge
- **Photo deduplication** — hash-based dedup avoids duplicate photo storage on restore
- **Asset recovery** — recovers photos from filesystem if missing in backup
- **Pre-flight analysis** — BackupAnalysisModal shows detailed preview before restore (conflicts, counts, warnings)
- **Post-import report** — ImportReportModal summarises what was imported/skipped/merged
- **Legacy format support** — imports older JSON-format backups alongside modern ZIP archives
- **SMTP credentials stripped** on export for security — never included in backups

12. Additional Features

Email Integration

- Direct SMTP email sending with PDF attachments
- Editable preview (To, Subject, Body) before sending
- Auto-status update on send (Erstellt → Zugestellt)
- IMAP sent-folder append
- Fallback to mailto: link if SMTP not configured
- Sent tracking with tooltip on document list

Dashboard

- Summary cards: open jobs, overdue invoices, revenue
- "In Arbeit" section with quick-complete action
- Overdue invoice highlighting

Multilingual

- Full UI in 4 languages: German, French, Italian, English
- 580+ localised strings
- Switchable at runtime

Auto-Save & File System

- Automatic save to local filesystem (File System Access API)
- Session-scoped directory permissions
- Browser-based — no installation required
- Offline-capable with IndexedDB storage

Swiss QR Payment Slip

- SIX-compliant QR-bill on invoices (CH only)
- Embedded directly in invoice PDF
- Toggleable in settings

13. Pricing

PDR Kalk vs. Competitor — Side-by-Side

	PDR Kalk	Competitor (Provider B)
Pricing model	One-time purchase	Monthly subscription
Price	EUR 750 (one-time)	~CHF 92/month
Year 1 cost	EUR 750	CHF 1'100
5-year cost	EUR 750	CHF 5'500
Setup fee	None	Required
Additional user costs	Unlimited installations — licensed to your company	Per-user charges apply
Internet required	No — works fully offline	Yes — cloud-based, requires internet
Data ownership	100% local — your data stays on your device	Cloud-hosted — provider controls infrastructure
Subscription cancellation	N/A — you own the software	Access ends upon cancellation

Over 5 years, PDR Kalk saves you thousands compared to subscription-based alternatives. One payment, no recurring fees, no per-user charges, no internet dependency.

Two Licensing Options

	Lifetime License (Recommended)	Monthly Online Access
Price	EUR 750 one-time	EUR 40 / month
Installations	Unlimited PCs — licensed and branded to your company name & details	Browser-based (online version)
Offline use	Yes — fully offline capable	Limited — requires initial page load
Data storage	Local device — fully under your control	Browser storage only — see notice below
Updates	Small updates & fixes included free. Major feature additions or updated insurance pricing matrices may incur an optional fee.	
Cancellation	N/A — perpetual ownership	Cancel anytime, access ends immediately

Important notice — Online version (monthly): The online version stores all user data exclusively in your web browser's local storage. Clearing your browser cache, cookies, or site data **will permanently erase all your estimates, invoices, customers, and photos**. Regular backups via the built-in export function are strongly recommended. The lifetime license version stores data locally on your device and is not affected by browser cache clearing.
